

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

In *Copenhagen* were *Born* 2604, *Buried* 1914, *Married* 701 Pair. Therefore 690 more *Born* than *Buried*.

In *Amsterdam* there *Died* 7119, and were *Married* 2289 Pair.

In *Epperies*, *Born* 203, *Died* 132.

In *Dantzic*, *Born* 2002, *Buried* 1495, and *Married* 537 Pair.

I have but just got the *Acta Breslaviensia*, or else would have sooner sent this.

Adieu, &c.

XI. *Ingens Materiæ Purulentæ copia cariem & separationem totius Ossis Mali, &c. inducens, & per triennium ex Ore Pueri defluens, observata à Domino Petro Hardisway, M. D.*

DI E *Sexto Mensis Febr. 1724.* advocabar ad Puerulum decennem, qui à sex septimanis febre lentâ decumbebat malè multatus. Præscriptis quæ res postulabat remediis, intrâ sex vel septem dierum spatium à morbo liber evasit: Verùm diebus aliquot elapsis, ingens in Genæ dextræ interioribus subortus est Tumor, puero nihilominùs, quoad cætera benè valente. Ore ejus ægrè diducto, in conspectum veniebat ingens Puris quantitas, at unde manaret, præ Pueri proterviâ non licuit pro hâc vice explorare. Ideò consulebam tantùm, ut ficum in lacte coctam ad tumorem emolliendum, atq; si fieri posset rumpendum admovent. Mane sequenti Os incredibili ferè Puris copiâ, teterrimi odoris (tumore intereâ disrupto) diffinuebat. Gargarisinate modicè detergente præscripto, circâ vesperum Pus pari omninò quantitate

quantitate atq; priùs depluebat. Mirabar fanè unde hoc provenire posset, cùm *Ulcus* in *Genâ* tanto proventui nequaquàm sufficere videretur; suspicabar autem (fœtore præ cæteris suadente) materiæ istius fontem in capite alicubi intrâ ossa latitare: quod cùm paulò diligentius investigarem, ecce *Os Maxillæ superioris ad dexterâs* carne (quæ quasi semicocta utrinq; recesserat) denudatum prorsus atq; *Carie* correptum, & ex *Dentium Alveolis* (dentes enim puerulus, ceu inutiles, suis nullo negotio jam extraxerat digitis) hoc materiæ purulentæ profluvium jugiter delabi: quapropter Chirurgus è viciniâ advocatus est, cui committebatur negotium. Huic suadebam, ut dum *Ossis* medelæ incumberet, *Ulceris* itidem deterfioni & consolidationi operam daret; verùm quicquid dicerem, nulla quæcunque *Genæ* suppuratæ adhibere voluit medicamina: quo factum est, ut ea iterum in molem ingentem, atq; alterâ (sinistrâ sc.) duplò major citò excresceret. Mandibulæ *Cariosæ* solummodo penicillum tincturâ quâdam, forsan *Myrrhæ*, imbutum applicabat. At longo temporis spatio tandem emenso, cùm parùm suâ tincturâ proficeret, hamulo adinoto, quod temporius factum debuerat, *Os Mali* integrum evellebatur. Ab *Ossis* extractione *Gena* nequicquàm subsidebat, sed potiùs incrementum sumebat, & materiæ purulentæ copîa nullatenus minuebatur. Osse autem abrupto, *Ossis Palati* dimidium cum *Narium Septo* absumptum est; parte etiam infimâ *Orbitæ oculi* simul abreptâ, ut in Iconibus adjectis clariùs ostendere sim conatus. His addendum, quod Tumore *Processui Zygomatico* superstiti incumbente, *Gena* mole duplò insignior *sinistrâ* extat, & oculum pœnè claudit, pure quasi ex fonte perenni indefinenter fluente.

Fig. ima. Facies *Ossis* externa.

b. Dens

- b. Dens *molaris* remotior.
- c. Pars *Orbitam* oculi faciens.
- d. Pars Offis ubi abruptum circa *Nasum*.
- e. Pars Offis ubi *Processus Zygomaticus* terminatur.
- f. Pars Offis sub *Labium superius*.

Fig. 2da. Forma interior Offis.

- 1 Pars ad *Nasum* abrupta.
- 3 Pars *Mandibulae* exterior & Dentis *alveolus*.
- 4 Pars Offis *oculum* attingens.
- 5 Pars *Maxilla* remotior.
- 6 Pars *Naris dextrae*, *septo* abrupto.
- 7 Dens *Molaris*.

Fig. 3tia. Os resupinatum exhibet.

- D, D, D, D. Pars *Offis Palati*.
- E, E, E. Alveoli dentium.
- F, F. Pars *Mandibulae exterior*.
- G. Pars *anterior* ejusdem.
- H. Dens *Molaris*.

Fig. 4ta. Facies interior Offis parum reclinati.

- A, A, A, A. Pars *Mandibulae*, & *Alveoli* Dentium.
- B. Locus ubi os abruptum circa *Nasum*.
- C. Pars offis *Oculum* attingens.
- D. *Maxilla* pars remotior.
- E. *Dens Molaris* remotior.
- F. Pars *Offis Palati*.

G. Pars *Naris dextrae* *septo* abrupto, ut in *Fig. 2da.* N^o 6.

Post hæc, idem vir peritissimus per Literas die 24. Decemb. 1727. datas, *Editorem* certiozem fecit, "Tumorem supra descriptum in eodem adhuc remanere statu, "Materiâ Puriformi Os & Fauces prò solito irrigante. "Puer cætera sanus edit, bibit, dormit, & unâ cum "aliis suæ ætatis quotidie alacriter ludit.
